The Urban Design Group name has a reputation for manufacturing exceptional streetscape furniture and associated items for more than 60 years. This family owned and operated company now has second generation staff working within the business.

This 60 year journey has seen many, many business relationships begin and still prosper today.

Our long standing clients operate in many areas that include local government, property developers, schools (public & private) and a long list of customers in the private sector.

The commitment by senior management to keep reinvesting in the business has ensured that our state of the art manufacturing facility, has a large footprint of modern manufacturing equipment computer software (CAD drawing and design) available for our loyal customer base.

We are very particular about ensuring that our employees work within a happy environment and are well trained to use and operate the latest available equipment, together with a stringent quality control system this ultimately ensures that all products are built to the highest standard.

We are extremely proud of our many achievements reached over the 60 year journey and look forward to offering our products and services for many more years to come The Urban Design Group encompasses a happy staff environment with access to state of the art equipment enabling us to provide exceptional service to our customers.

DO IT ONCE, DO IT PROPERLY, DO IT NOW.
Urban design group has an in-house design team who are dedicated to ensure that every item produced suits its intended purpose and fits within the immediate surrounds. Our close relationship with our customers during this process means that our customers get the item they set out to purchase.

The availability of our CAD service to our customers means they are able to view the design and contribute throughout the step by step design process. With our customers involvement in the design process we are able to achieve our goal faster with customer satisfaction the ultimate finish.

MANUFACTURE
For over 60 years Urban Design Group have been involved in manufacturing and during this time we have seen dramatic change and improvement with manufacturing equipment and its extraordinary capabilities.

Our manufacturing facility boasts all of the equipment required for the manufacture of quality Street and Park furniture products.

We continue to invest in the latest technologies to ensure we are able to compete on an international stage, and together with our stringent quality control program this allows us to produce flawless products for our customers on time, every time.

INSTALLATION
Our team of installation staff operate modern equipment to ensure the job is completed on time every time with minimal breakdown time and interruption, we have a large range of vehicles and equipment to complete all jobs both large and small.

All of our installation staff our well experienced to operate the equipment required for every job, from excavators through to high rise scissor lifts we have the right equipment at hand ready to go.
At Urban Design Group we design and manufacture an extensive range of high quality outdoor shelters. These outdoor shelters are suitable for parks, school and community sports fields, bus and tram stops plus we manufacture large shade shelters for park and community areas.

Our design team are able to produce an outdoor shelter to suit any requirement to ensure it fits within the immediate surrounds and environmental requirements.

The Urban Design Group range of shelters boast a choice of over 35 different designs suitable for park cover and shade shelters, bus shelters, sports field shelters and smokers shelters.

Our manufacturing facility has state of the art CAD facilities together with experienced staff to assist in the design process - from a simple school sports field shelter to a tram or bus super stop shelter we can assist and customize the right product for your application.

ALL URBAN DESIGN GROUP SHELTERS CAN BE MANUFACTURED USING A VARIETY OF MATERIALS TO SUIT CUSTOMERS INDIVIDUAL REQUIREMENTS INCLUDING DURAGAL, STAINLESS STEEL, ALUMINIUM ETC.
All Urban Design Group shelters can be manufactured using a variety of materials to suit customers' individual requirements including Duragal, stainless steel, aluminium etc.

Rubbish and recycling receptacles are a necessary part of keeping our outdoor public spaces in pristine condition. We have a large selection to choose from and once again all of our products are produced under the highest quality control to ensure they function as intended for many years.

We use many different raw materials and finishes to ensure the finished item fits in with the immediate surrounds. From a natural stained timber to a modern stainless steel or powder coated finish we can offer the right cosmetic look to satisfy your requirements.

We have also just released a wide range of rubbish and recycling receptacles using recycled plastics, which is great for low maintenance and for the environment.

Our bollards offer an extensive range of eye-catching finishes and designs including stainless steel for the more modern look, or you may choose one of our more heritage designs finished in a durable powder coated colour of your choice.

We also offer a wide range of bollards produced from locally supplied timber together with recycled plastics that are available in many different colours and finishing textures. Bollards produced in these materials offer a soft natural backdrop whilst also maintaining the security requirements and helping preserve our environment with the use of recyclable materials.
Permanent pedestrian fencing and barriers can be designed to specifically fit within the immediate surrounds and environment, we always ensure they are manufactured using suitable materials to keep pedestrians safe while moving around in shared locations with motor vehicles.

We offer an extensive range of tried and tested decorative and pedestrian protection systems that stand the test of time, our in house CAD systems allow us to work closely with customers to ensure the desired finished look is achieved together with suitable protection for pedestrians.
Protective barriers are used extensively across a wide range of industry, retail precincts and high foot traffic areas. These barriers are used to ensure that a suitable means of protection is offered to keep buildings, vehicles and property can remain free from damage.

Our design team at Urban Design Group can assist with any specific design requirements you may have and offer a range of materials for construction.

In many cases these barriers need to designed and manufactured to suit specific requirements and needs of individual customers and locations.
Today’s design of parks and open spaces quite often incorporate established flora areas that offers a great contrast of man made furniture and nature. Inclusion of tree guards instil great cosmetic value to these areas and are a practical function protecting people and nature.

Our manufacturing facility has state of the art CAD facilities together with experienced staff to assist you in the design process. Wether you want a simple, practical tree guard or a custom design we can assist you with the right product for your application.
From design through to installation Urban design group can offer a complete service to our customers, from concept artwork to the structural support frames we work closely with our customer to ensure we achieve the desired result. From the larger type pedestal style precinct sign down to park pointer / directional signage we have been designing, manufacturing and installing a wide variety of signs for councils, property developers and the private sector for many years.
AVENUE OF HONOUR

YARRAMBAT PRIMARY SCHOOL
Today we live in a society that is now more than ever conscious of healthy and clean living. Even though more people are quitting the smoking it is still our responsibility to offer a solution to cigarette butt disposal in public spaces.

We offer a wide range of well designed cigarette disposal units that include a variety of free standing designs, through to smaller wall mounted models.

Manufactured from both aluminium and stainless steel materials ensures that they are very durable and will stand the test of time outdoors in our harsh weather conditions. Powder coated options are also available to assist with the product blending into the surrounds of our parks and gardens.
