ST90

LINDBURN

A customer favourite, the Lindburn seat features a durable mild steel frame with comfortable wide armrests. Installation is flexible, with options for surface mount base plates or permanent in-ground legs.

The Lindburn seat is shown here featuring our low-maintenance recycled composite slats, offered in classic Walnut (right) and contemporary Light Grey (above).

ST280

LINDBURN BENCH

Available as a bench seat, shown here with recycled composite slats .

PS370 picnic setting also available

Did you know the Lindburn range is part of our Quick Delivery program?

ST30

ALBERT

With a classic look and robust durability, the Albert seat is definitely a popular choice in the range. Featuring a mild steel frame with surface mount legs and available with low maintenance recycled composite slats (pictured) or stained timber slats.

Pictured above is a modified pair of Albert seats, manufactured for a concrete wall in a local park.

We can powder coat in your choice of colour from the standard Dulux colour range.

Need it in a hurry? Our ST30 seat is a Quick Delivery item too!

SEATING

ST590

BANYULE

Our Banyule seat is manufactured with a mild steel powder coated frame, and available with surface mount base plates or in-ground legs. Pictured right with our recycled composite slats in Walnut, and below with stained timber slats.

PS560 picnic setting also available

ST750

BANYULE BENCH

Also available as a bench seat, pictured here with stained timber slats and surface mount base plates.

ST160

STIRLING

Boasting heavy-duty construction, our Stirling range is ideal for all environments. Available in mild steel with a hot-dipped galvanised finish, or powder-coated finish in your choice of Dulux colour. Choose between an in-ground leg design or base plate for concrete bolt down installation.

Need something longer than standard? The Stirling range is easily customisable. Pictured right is park seating for memorial services.

ST150

STIRLING - CURVED SEATS

Made from mild steel and available in a variety of finishes, the Stirling curved bench is ideal for high traffic environments

ST130

STIRLING - ROUND

The Stirling Round is a dual-purpose unit, offering essential tree protection and a comfortable, shady seating area.

ST810

CLAREMONT

The Claremont seat, a striking new addition to our collection, features a stainless steel frame enhanced by a warm, glass-bead blasted finish, perfectly complemented by spotted gum timber slats.

ST70

RIVERVALE

Constructed from high-quality stainless steel, the Rivervale seat brings a sleek, modern touch to any urban space and built to withstand heavy foot traffic. Installation is simple, with options for in-ground placement or surface mounting via base plates.

ST60

DALBY

Manufactured from lightweight aluminium, complete with Urban Design Group safety end caps. The Dalby seat is a perfect addition to sporting facilities and schools. Available in various lengths and can be installed in-ground or with base plates ready to bolt onto concrete. Can be shipped anywhere in Australia as a flat pack item.

ST205

GOULBURN RELOCATABLE

Lightweight, stackable and relocatable. Perfect when extra seating is required. Complete with rubber stoppers.

ST200

GOULBURN

Lightweight aluminium and including Urban Design Group safety end caps, the Goulburn bench seat is a perfect addition for shelters, sporting facilities, and schools. It is available in various sizes and can be installed in-ground or surface mounted via base plates. Can be flat-pack shipped anywhere in Australia.

ST410

SANDRIDGE

With a contemporary urban feel, the Sandridge seat offers great versatility in its options. Choose from a sleek stainless steel, mild steel powder-coated in a standard Dulux color, or hot-dipped galvanized frame. The slats are available in stained timber or a low-maintenance recycled composite. For a tailored urban look, pair it with the Sandridge Picnic Setting (PS470) and Sandridge Bench Seat pictured below.

PS540 picnic setting also available

ST210

GLENVALE

The Glenvale bench seat is a great low-maintenance option that's both heavy-duty and durable. It features Duragal slats and you can choose from a galvanised finish or have it powder-coated. Ideal for schools, and sporting facilities. Available in various lengths.

ST40 **YORK**

For a modern look, the York seat is an excellent choice. With a mild steel frame, you can select between stained timber or low-maintenance recycled composite slats. The York seat is highly versatile, supporting both in-ground and surface-mounted installation onto concrete.

ST20

WARRAGUL

The Warragul seat is a popular choice for parks and gardens. It features a durable mild steel frame, legs, and armrests, which can be finished with either a powder coat or a hot-dipped galvanised coating. You can choose between stained timber or low-maintenance recycled composite slats.

ST580 **WHITEHORSE**

The Whitehorse seat is constructed from mild steel, offering durability with the option of either a galvanised finish or a powder coating in a standard Dulux colour.

ST290

TULLY

A great all-rounder, the Tully seat offers your choice of stained timber or low-maintenance recycled composite slats. The frame can be hot-dipped galvanised or powder-coated in any standard Dulux colour to complement the environment. The Tully seat is designed to be securely bolted onto concrete.

ST400

TULLY BENCH

The Tully bench seat is a stylish addition to any project, designed to pair seamlessly with our Tully seat and Albert seat.

ST340

GILMORE

For a modern look, the Gilmore bench seat features a sleek stainless steel frame and stained timber slats. Available in various lengths to suit your specific needs.

ST670

COBURN

A modern, slimline option available in various lengths to suit your venue. It features a mild steel frame that can be either galvanised or powder coated. You can select classic stained timber, or recycled composite slats.

ST360

GARLAND

Crafted from mild steel, with versatile options: choose from stained timber or recycled composite slats. Its legs can be galvanised for enhanced durability or powder coated in any standard Dulux colour.

ST570

FRANKSTON

Crafted for both style and comfort, the Frankston seat features a steel frame that can be either galvanized for enhanced durability or finished with a powder coat colour.

Choose from the warmth of stained timber slats or our low maintenance recycled composite slats. For installation, choose between a base plate leg ready for bolting to a concrete surface or an in-ground design.

ST10

HARMONY

Designed for all outdoor environments, the Harmony seat delivers a strong, solid design with rustic appeal. Featuring stained solid timber battens. Its unique character is enhanced by generous square support legs and distinctive triangle-shaped timber accents.

ST310

KINGSVILLE BENCH

The Kingsville bench seat offers a practical seating solution, featuring a mild steel frame and legs. The frame can be hot-dipped galvanised for superior corrosion resistance or powder-coated in your preferred standard Dulux colour. This versatile bench offers two slat options: classic stained timber or environmentally friendly recycled composite. As pictured here optional armrests are also available.

PS490 Kingsville picnic setting also available.

ST840

KINGSVILLE CURVED

ST390

HENLEY

Manufactured from mild steel with recycled composite slats, designed to complement any outdoor setting. You can choose a galvanised finish for durability or a powder-coated colour to suit your aesthetic.

ST390

HENLEY

Pictured right with raw timber slats and a powder-coated mild steel frame.

ST690

PENINSULA

A newly designed seat, with mild steel legs that can be galvanised or powder coated, ready to be bolted securely to a concrete surface. With a modern, contemporary feel, the Peninsula bench is an excellent choice for your next project.

PLATFORM SEATING

ST230

SEAVIEW

The Seaview platform bench is a versatile and durable seating solution perfect for parks and urban settings. It is built with a mild steel frame and legs, which can be galvanised or powder coated for long-lasting protection. To ensure a fit for any space, you can choose from three generous sizes: 1200x1200, 1500x1500 or 1800x1800mm. Seating options include stained timber for a natural look or recycled composite for an eco-friendly choice. Installation is flexible with both surface mount and in-ground designs available.

ST710

HARMONY

The Harmony platform seat stands out with its substantial 190mm wide by 70mm thick timbers.

ST440
DAREBIN

The Darebin Council park seats, feature timeless angles and a sophisticated combination of timber and steel, offering a truly modern feel. Select from a premium stainless steel or galvanised finish for the frame. Each Darebin seat is designed for secure concrete surface mounting.
